

**URBAN MOBILITY  
FOR A NEW GENERATION  
AND A SUSTAINABLE FUTURE**

ELLWEE.COM

We started Ellwee because we had a dream of a better world. Where cities are built for people, not for cars.

Ellwee is the first green, affordable, multi-purpose vehicle, that seriously challenges traditional transportation and thinking. You can choose color and accessories that suits your individual needs. Ellwee has a manufacturing process that is based 100% on modular assembly.

This ensures lean production, speedy delivery and on-demand customer based solutions. In fact, Ellwee is so advanced, that it is more similar to a car than your average scooter.

We have employed top class engineers with experience from Volvo and Saab to develop a truly unique vehicle. We deploy reliable and tested technology originating from the heartland of the automotive industry in Sweden. Ellwee features a patent pending rear pivot axle that minimizes wear and tear on the surface and optimizes the overall experience. So, if you are in the business of providing a fun and safe experience – you should definitely consider Ellwee.

25km/h  
15mph

## EASY RESORT

We're thrilled to present our new vehicle - The Ellwee Easy. Designed to be inclusive, the Ellwee Easy has all the functionalities from Ellwee X combined with improved characteristics and features to achieve the highest levels of stability and handling. Slide in with ease and enjoy the freedom of mobility with accessible design.

#### RANGE

65km  
40mi

#### EASY GOLF

I think the big problem with golf has been time, and now we're back hopefully to where we can really speed up and play a lot more golf in a lot shorter time.

- Helen Alfredsson, PGA Professional
